

RRURAL

WATER

TENDER

FIELD OF INTERVENTION

RURAL / SEMI-URBAN

You should appreciate particularly...

The equipment monoblock assembly which offers the following advantages:

- Use in rural areas, category 2: rural.
- A solid assembly which avoids gaps and distortions between tank and lockers.
- The assembly is not bound to the torsionsconstraints of the chassis thanks to its 3 points fixation (2 silentblocks at front and an oscillating support at rear).
