

FIELD OF INTERVENTION

CROWD CONTROL

# RIOT CONTROL VEHICLE

*You will particularly appreciate...*

- The reinforced cab air conditioning system for long station.
- A good power/weight ratio.
- Logical and easy controls.
- Protection offered to the crew.
- Means of riot control :
  - water projection,
  - color dye projection,
  - CSL stun gas projection,
  - foam projection, without exposing the vehicle's crew.
- It allows policemen to identify demonstrators thanks to the coloured video.
- The man/machine interfaces located in the cab and in the pump compartment

*Photos and documentation  
Are not binding*
